

SATYAKI BANERJEE

Full Stack Developer | Angular & Spring Boot | Healthcare & Enterprise Tech

satyaki322000@gmail.com | +91 8851478609 | linkedin.com/in/satyaki-banerjee-57a909190 | github.com/satyaki322000 | New Delhi, India

SUMMARY

Full Stack Developer with 4.5+ years building scalable enterprise and healthcare platforms using Angular (v9–v19) and Spring Boot. Led teams of 3–4 developers across healthcare and government projects, delivering end-to-end products from scratch — including DICOM medical imaging viewers, Razorpay & POS payment flows, real-time video/chat systems, and large-scale government microservices migrations now live at national scale. Experienced with AWS deployments, Docker, CI/CD, strict SDLC & QA collaboration, and AI-assisted development. Microsoft Azure certified (AZ-104).

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | Arka Informations System / Docty Inc., New Delhi

April 2025 – Present

Project: Docty — Multi-Tenant Healthcare Platform (built from scratch)

- Led 3 developers to architect Angular v17+ frontend from ground up for Patient, Doctor, Pharmacy, Clinic & Monitor portals (5,000+ users); NgRX state & auth management across all modules; strict SDLC with QA team throughout.
- Integrated DICOM viewer for surgical .dcm files; built Razorpay payment gateway & POS billing; HIPAA-compliant Agora RTC/RTM video (35% latency reduction); Socket.IO chat at 99.5% delivery reliability.
- Deployed on AWS (S3, EC2) with Docker; achieved 98% Lighthouse score with Angular Material responsive UI.

System Engineer — Full Stack Developer (Angular / Java) | Tata Consultancy Services, New Delhi

July 2024 – April 2025

Project: EBR-CBIC — Airport Management System (Central Bureau of Indirect Taxes & Customs) | Live at Varanasi, Pune & 2 other airports

- Led 4 developers to build Airport Management System — live at 4 Indian airports — covering baggage handling & charges, crew & pet management, item taxation (GST, surcharges, weight-based rules), Jasper Reports, and POS payment flow.
- NgRX across 50+ features; page load 4.2s → 1.8s; zero security audit failures; strict SDLC with QA — code reviews, regression & UAT cycles; 20% fewer production bugs.

Assistant System Engineer — Full Stack Developer (Angular / Java) | Tata Consultancy Services, Noida

November 2022 – June 2024

Project: RMS — Legacy Migration: Export, Import & CMS (Postal) Microservices, CBIC | Live across Indian seaports, airports & post offices

- Migrated legacy Struts/JSP monolith to Spring Boot 2 + Angular 13 microservices for India's Customs — covering Export, Import, and CMS (Postal) domains; system now live at virtually all Indian seaports, airports, and post offices.
- Developed 12+ microservices & 40+ RESTful APIs handling 5,000+ daily requests at 99.9% uptime; 40% performance gain and 60% faster DB queries post-migration.

Assistant System Engineer Trainee — Full Stack Developer | Tata Consultancy Services, New Delhi

December 2021 – October 2022

Project: ITBA — Income Tax Business Application

- Built Spring Boot + Angular v13 app with RBAC for 5 user roles; 30+ components, JUnit-tested APIs, 20% faster initialisation.

TECHNICAL SKILLS

Frontend: Angular (v9–v19), NgRX, RxJS, Angular Material, Bootstrap, TypeScript, HTML5, SCSS, Responsive Design, React (familiar)

Backend: Spring Boot, RESTful APIs, Microservices, Java

Payments: Razorpay, POS Systems

Real-Time: Agora SDK (RTC/RTM), Socket.IO, WebSocket, DICOM Viewer

Cloud & DevOps: AWS (S3, EC2), Microsoft Azure, Docker, Git, NPM, CI/CD Pipelines

Databases: MySQL, Oracle

Testing & Tools: Jasmine, Karma, JUnit, Jasper Reports, Swagger / OpenAPI, Postman

AI Tools: Claude, GitHub Codex, Kilo Code, Perplexity

EDUCATION & CERTIFICATIONS

B.Tech in Computer Science — Jaipur National University, Rajasthan | 2017–2021 | **Certifications:** Microsoft Azure Administrator (AZ-104, valid Mar 2026) · Cybersecurity for IT Professionals (LinkedIn, 2024) · Data Structures in Java (Coding Ninjas, 2024)
